Polarizing Plate (PL Plate) / IKBA-PL IKR-PL IKR-F PL

- This PL plate or PL filter is attached to a lighting device and a camera lens to remove glare and surface reflections on workpieces.
- It can be mounted using screws in the same way as a diffusion plate.
- The polarizing plate for bar light is grouped into type A and type B according to the polarizer direction.
- There is a possibility of deformation or discoloration due to heat, depending on the use environment. Take an appropriate action to release heat so that the temperature does not exceed the heatproof limit (74°C). Otherwise, the product may not be able to deliver the original performance. Periodically check the use environment.

※ Some of the IDBA-C series are exclusive models.
The polarizer cannot be attached to products with exclusive models after the order.
■ represents the lighting color (DW = white, DR = red, B = blue, G = green).
For models with S filled in for ▽, the diffusion plate is mounted as its specification.

Polarizer Direction

If you want to irradiate the bar illuminated from four directions, please align the direction of the polarizer using the A-B type.
